

REMARKS

In the Specification:

The Applicants respectfully request that the foregoing amendments be made prior to examination of the present application.

In the Specification, paragraphs on pages 26, 51, and 76 have been amended to correct typographical errors that would be immediately apparent to one of skill in the art of medicinal or organic chemistry. In particular, the structure illustrated for compound 093 in the application as filed was a duplicate of the (correct) structure for compound 092. The illustrated structure for compound 093 was replaced with a new structure to make the illustration consistent with the formal name given for compound 093. Similarly, the structure for compound 057 was replaced with an illustration consistent with the formal name for that compound.

The paragraph and related figure running from line 5 on page 76 to line 2 on page 77 of the Specification was also changed to correct the obvious omission of a carbonyl functionality error in structure 10 and render the labels of structures 10 and 11 consistent with the claims. One having skill in the medicinal or organic chemistry arts would understand that figure 10 requires a carbonyl in view of the details given in the Examples. *See, e.g.*, Specification at page 78, line 20, which illustrates the use of a compound having formula 10 wherein R⁶ is pyrid-3-yl, R⁷ is hydrogen, and L is bromo.

In the Claims:

Please cancel Claims 2–28.

Please add Claims 29–60 as described above.

This amendment changes the claims pending in this application. A list of the claims that are, or were, pending in the application, irrespective of whether the claims remain under examination, is presented above with an appropriate status identifier.

After amending the Claims as requested above, Claims 1 and 29–60 are now pending in this application. Support for the new claims can be found in the Specification, *e.g.*, at page 3, line 15, through page 76, line 5.

Applicant believes that the present application is now in condition for allowance. Favorable consideration of the application as amended is respectfully requested.

The Examiner is invited to contact the undersigned by telephone if it is felt that a telephone interview would advance the prosecution of the present application.

Respectfully submitted,

Date 4/19/04
